High Value Announcements

AUTOSAR CAPI Release Event 1.0

AUTOSAR has announced the release of CAPI 1.0, providing a common implementation of the AUTOSAR Adaptive Platform, including source code and code generators. The release is designed to accelerate development, improve interoperability, and strengthen collaboration across the automotive software ecosystem.

Learn more about CAPI 1.0 first-hand during our live event on October 26. To accommodate our international audience, we will offer **two identical sessions at 08:00 UTC and 13:00 UTC**. Please register for the session that best suits your schedule.

Participants will also have the opportunity to submit questions throughout the event via the live chat, where our experts will respond in real time.

All WG Meeting 2027: Mark Your Calendars!

Dear AUTOSAR Working Group Members,

We are happy to provide you with further details about our upcoming event.

Please get ready to plan your next work trip for the last week of September: September 27 - October 1, 2027. The event will take place at the Steigenberger Airport Hotel Frankfurt, Germany.
We look forward to a productive event and to welcoming all of you in Frankfurt.

Registration and hotel room booking will open in Q2 2027. Stay tuned for updates on our website!

Organizational Updates

AUTOSAR Strengthens Global Collaboration on Automotive AI Standards

AUTOSAR is intensifying international collaboration to define standardized AI capabilities for upcoming releases. Building on recent domestic technical exchanges, regional working groups are establishing regular synchronization under the AUTOSAR Concept Group (CONC-AI) framework. The initiative focuses on prioritizing core AI deliverables, harmonizing technical concepts across regions, and avoiding duplicate efforts to deliver seamless, production-ready standards.

Domain experts and member organizations are warmly invited to help shape these emerging standards. Further details and participation guidelines can be found in the Call for Experts: AI4AR.

Curriculum in Future of Education and Training in AUTOSAR

AUTOSAR has published three new training curricula: **AUTOSAR Classic Platform Basic, AUTOSAR Adaptive Platform Basic,** and **Timing and Tracing**. Developed by the UG-ET, the curricula provide a common foundation and learning objectives for key AUTOSAR topics, helping improve transparency, accessibility, and consistency across training offerings.

The curricula are publicly available and can be used by training providers and interested parties as a reference for developing high-quality AUTOSAR training and structured learning paths.

AUTOSAR China: Community, Innovation, and Outreach

The **Q3 AUTOSAR User Group China Meeting** and **Desay SV × AUTOSAR AI Tech Forum** were held on 18 September in Huizhou, China, bringing together nearly 100 industry experts. The event featured presentations on AI and AUTOSAR integration, practical use cases, and a panel discussion on AI-driven transformation in automotive software engineering. As AUTOSAR's first event of this kind in South China, it provided valuable insights into regional requirements and future AI-related developments.

AUTOSAR China Hub Launches BiliBili Channel

AUTOSAR China Hub has officially launched its BiliBili channel to expand technical outreach and community engagement. The platform will feature interviews, technical training, event recordings, partner collaborations, and live-streamed sessions, providing new opportunities to connect with the AUTOSAR community.
